

Declaration of the Promotion for the Low Carbon Cities

(tentative translation)

Whereas the global warming is a serious problem for all the lives on the earth, we are responsible for taking global action to challenge greenhouse gases reduction.

We, the members of Promotion Council for the Low Carbon Cities, proclaim to take actions for the realization of the low carbon society, being in the vanguard of Japan.

1. We challenge the sustainable actions which promote the radical revolution of life-style, work-style and city construction.
2. We aim to be praiseworthy cities or regions, disseminating the superior actions domestically and abroad.

Dec. 14th, 2008

Chairperson of Promotion Council for the Low Carbon Cities

Kenji Kitahashi
