Tsukuba Super Science City Initiative

Our Mission

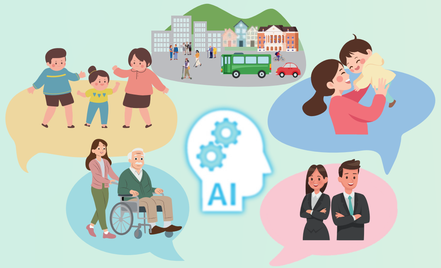

Creating new opportunities and diverse happiness through science and technology

The City of Tsukuba aims to improve urban functions and residents' lives with science and technology, following the SDGs' principle of "leave no one behind." The initiative promotes regulatory reform, digital technologies, and community involvement, moving quickly from trials to real-world use.

Resident-Centered City With Digital Technology and AI

Administration

Visualizing Residents' Voices Using Generative AI

Development of the "Tsukuba City Data Analytics Platform," which uses generative AI to analyze and visualize residents' feedback

Online Voting

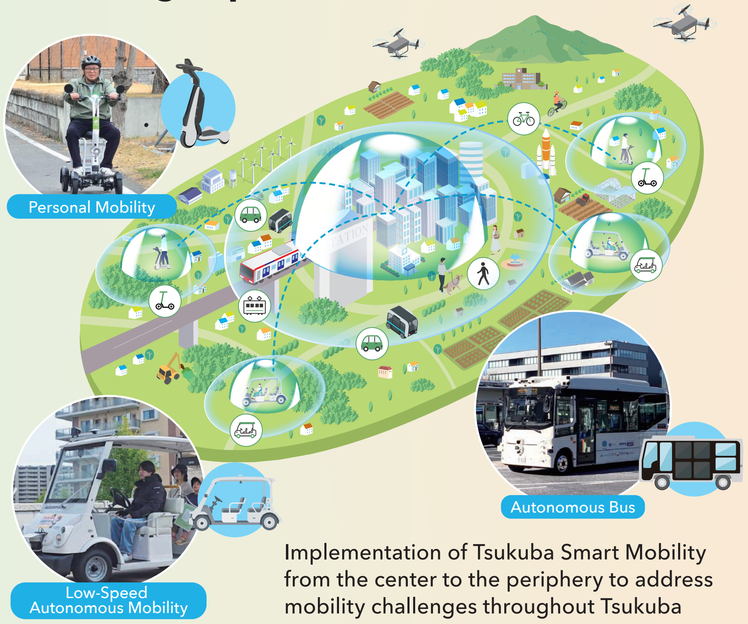

Aiming to introduce online voting with strict personal authentication and advanced security so that people who find it difficult to go to polling stations for various reasons can vote without having to visit them

Transportation to Anywhere at Any Time

Mobility

Expanding New Mobility Citywide "Driving Implementation Outward"

Implementation of Tsukuba Smart Mobility from the center to the periphery to address mobility challenges throughout Tsukuba

Supporting Independent, Active Living in the Era of 100-Year Lifespans

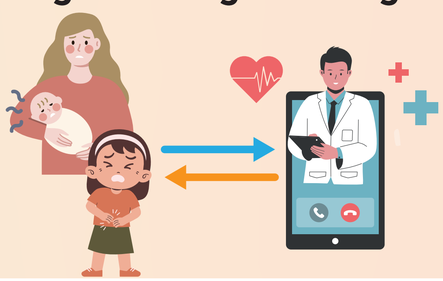

Healthcare

Health Management Utilizing Personal Data

Development of "Personal Food Recommendations" to provide meal recommendations based on vital data recorded in the PHR app and daily dietary records

Tsukuba City Holiday and Nighttime Digital Emergency Center

Provision of medical consultations and online medical care outside regular medical facility hours using a telemedicine app

Message from the Mayor

Mayor of Tsukuba City
Tatsuo Igarashi

The City of Tsukuba is working to create future-oriented services that address local challenges by collaborating with companies, universities, and research institutions through the Tsukuba Smart City Consortium.

Residents take the lead in discussing and advancing initiatives that help address local challenges.
